## **BGC, INC. WATER & WASTEWATER SERVICES TEAM RECEIVES TRAINING FROM WELD-ON & RARITAN PIPE**

Perkasie, PA - On Friday, August 18, 2017, [Blooming Glen Contractors, Inc.'s \(BGC's\) Water & Wastewater Services \(WWS\) Team](#) received hands-on technical training conducted by the professionals from [Weld-On®](#), global leader in the manufacture and supply of solvent cement, cleaners and primers for PVC, CPVC and ABS plastic pipes, valves and fittings. This on-site seminar was held in BGC's newest WWS location, a recently renovated shop and office facility located in Skippack, PA. BGC office and technical staff were educated on solvent welding of plastic pipe and fittings.

The WWS staff reviewed the specifications of [American Society for Testing and Materials \(ASTM\) D2855](#), the standard practice for the two-step (primer and solvent cement) method of joining PVC or CPVC pipe and piping components with tapered sockets. Weld-On discussed how to select the right solvent and cement for the job, the solvent safety precautions that follow, and the primary causes of joint failure. The presence of Weld-On, manufacturer of and expert on the primers and solvents utilized in this process, provided BGC with invaluable knowledge and expertise. Safety is always at the forefront of the BGC WWS Team's mind; adherence to all ASTM standard practices is emphasized on every project.

BGC's WWS Team wishes to extend a special "Thank You" to Weld-On for supplying their top-of-the-line products. We also wish to thank [Raritan Pipe](#), Weld-On distributor, for providing the professional representation and their extremely useful technical know-how. The BGC WWS Team is now even more equipped to serve its customers and clients within the growing water and wastewater services sector in the safest and most effective manner possible.

[Blooming Glen Contractors, Inc.](#) is a family owned and operated heavy civil construction services and site contracting company based in Perkasie, Pennsylvania. BGC provides full-service site contracting and heavy civil construction services in the following core service areas: [complete site and land development](#), [transportation & structures](#), [water & wastewater service](#), [design-build and value engineering](#), [demolition](#), [environmental](#) and [emergency response](#). Founded in 1971, we remain dedicated to providing our customers and clients with exceptional service and finished products of the highest quality.
